

SAHIL KAWALE

Cybersecurity Professional | SOC | VAPT | Application Security

📞 8655357757 ✉️ sahil.kawale911@gmail.com 🔗 linkedin.com/in/sahil-kawale 📍 Mumbai

SUMMARY

Cybersecurity-focused Computer Engineering professional with hands-on experience in **vulnerability assessment, network security, web/API security, and security-focused projects**. Practical exposure to **Burp Suite, Nmap, Wireshark, Kali Linux, Bettercap, HTTP/HTTPS, REST APIs, JWT authentication, and network reconnaissance**. Strong programming background in **Java, Spring Boot, MySQL and Python**, with experience developing backend applications and analyzing security weaknesses from both application and network perspectives. Interested in **VAPT, Application Security and penetration testing**.

EXPERIENCE

Junior Trainee Developer

Techpaathshala

📅 01/2025 - 05/2026 📍 Mumbai, India

- Developed backend applications and **REST APIs using Java, Spring Boot and MySQL**.
- Worked with **authentication modules, database operations, server-side logic and API workflows**.
- Built and tested backend functionality with focus on reliable and secure application behavior.
- Gained practical exposure to **secure coding and application-security considerations** while developing web applications.

PROJECTS

ThreatMatrix – SOC Security Dashboard

Python Flask | React | PostgreSQL | JWT | Docker

- Developed a security monitoring dashboard for managing and visualizing security events and alerts.
- Implemented JWT-based authentication and REST APIs using Flask with PostgreSQL backend.
- Worked with security-event workflows including alert management, event review, and false-positive identification.

MITM Attack Simulation [MAN IN THE MIDDLE ATTACK]

Bettercap | Wireshark | Network Security

- Conducted controlled Man-in-the-Middle attack simulations to study traffic interception and data manipulation.
- Used Bettercap and Wireshark to analyze network traffic and understand attack and detection techniques.
- Studied the role of encryption and authentication mechanisms in protecting network communications.

Shadow Port Scanner

Python | Scapy | Npcap | Network Security

- Developed a custom port-scanning tool to identify open, closed, and filtered ports across target IP ranges.
- Implemented network reconnaissance functionality to identify active services and analyze exposed ports.
- Strengthened practical understanding of network protocols, port scanning, and vulnerability assessment.

EDUCATION

Bachelor of Engineering - BE, Computer Engineering

University of Mumbai

📅 Present 📍 Mumbai, India

FULLSTACK JAVA DEVELOPER

Techpaathshala

📅 12/2024 - 12/2025

SKILLS
